sulfate or § 146b.103 for dihydrostreptomycin sulfate or crystalline dihydrostreptomycin sulfate, except:

- (1) The limitation on moisture content does not apply.
- (2) Its potency is not less than 250 milligrams per milliliter and not more than 500 milligrams per milliliter, unless it is intended solely for veterinary use and is conspicuously so labeled.
- (3) The histamine test may be omitted if it has been performed on streptomycin sulfate, dihydrostreptomycin sulfate, or crystalline dihydrostreptomycin sulfate used in preparing the solution.
- (4) It contains one or more suitable and harmless preservatives.
- (5) Its pH is not less than 5.0 and not more than 8.0.
- (6) It may contain one or more suitable and harmless buffer substances and stabilizing agents.

(c) * * *
(1) * * *
(i) * * *

(b) If it is dihydrostreptomycin sulfate injection, the statement "Warning—For use only in patients who cannot tolerate streptomycin."

(iii) On the circular or other labeling within or attached to the package, if it is dihydrostreptomycin sulfate injection and it is intended for parenteral use, warnings containing information to the effect that:

(d) *Request for certification, check tests and assays; samples.* (1) In addition to complying with the requirements of § 146.2 of this chapter, a person who requests certification of a batch shall submit with his request a statement showing the batch mark, the number of packages of each size in the batch, the number of milligrams or grams dissolved in each of such packages, the date on which the latest assay of the drug comprising such batch was completed, and if it is crystalline dihydrostreptomycin sulfate injection, the batch mark and (unless it was previously submitted) the date on which the latest assay of the crystalline dihydrostreptomycin sulfate used in making such batch was completed.

(2) * * *
(i) The batch; potency, sterility, toxicity, pyrogens, histamine content (except that the result of this test performed on the streptomycin sulfate, dihydrostreptomycin sulfate, or crystalline dihydrostreptomycin sulfate used in making the batch may be submitted instead), pH, and streptomycin content, if it is dihydrostreptomycin sulfate or crystalline dihydrostreptomycin sulfate.

[F.R. Doc. 68-15412; Filed, Dec. 26, 1968; 8:49 a.m.]

PART 148e—ERYTHROMYCIN Suppositories

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec.

507, 59 Stat. 463, as amended; 21 U.S.C. 357) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 2.120), the following new section is added to Part 148e to provide for the certification of the subject antibiotic drug:

§ 148e.35 Erythromycin suppositories.

(a) *Requirements for certification—*
(1) *Standards of identity, strength, quality, and purity.* Erythromycin suppositories contain in each suppository 125 milligrams of erythromycin in a suitable and harmless base. The erythromycin content is satisfactory if it is not less than 90 percent nor more than 120 percent of the number of milligrams of erythromycin that it is represented to contain. The moisture content is not more than 1.0 percent. The erythromycin used conforms to the standards prescribed by § 148e.1(a)(1)(i), (ii), (iii), (iv), (v), and (vii), except its moisture content is not more than 5.0 percent. Each other substance used, if its name is recognized in the U.S.P. or N.F., conforms to the standards prescribed therefor by such official compendium.

(2) *Labeling.* It shall be labeled in accordance with the requirements of § 148.3 of this chapter.

(3) *Requests for certification; samples.* In addition to the requirements of § 146.2 of this chapter, each such request shall contain:

(i) Results of tests and assays on:
(a) The erythromycin used in making the batch for potency, toxicity, moisture, pH, residue on ignition, identity, and crystallinity.

(b) The batch for potency and moisture.

(ii) Samples required:

(a) The erythromycin used in making the batch: 10 packages, each containing not less than 500 milligrams.

(b) The batch: A minimum of 30 suppositories.

(c) In case of an initial request for certification, each other ingredient used in making the batch: One package of each containing approximately 5 grams.

(4) *Fees.* \$0.75 for each suppository in the sample submitted in accordance with subparagraph (3)(ii)(b) of this paragraph; \$4 for each package in the sample submitted in accordance with subparagraphs (3)(ii)(a) and (c) of this paragraph.

(b) *Tests and methods of assay—*(1) *Potency.* Proceed as directed in § 148e.1 (b)(1), except prepare the sample as follows: Blend a representative number of suppositories for 3 to 5 minutes in a high-speed glass blender with 200 milliliters of absolute methyl alcohol. Add 300 milliliters of 0.1M potassium phosphate buffer, pH 8.0, and blend again for 3 to 5 minutes. Remove an aliquot and dilute to the reference concentration in 0.1M potassium phosphate buffer, pH 8.0.

(2) *Moisture.* Proceed as directed in § 141a.8(b) of this chapter.

This order provides for the certification of a new dosage form of an antibiotic drug already being marketed. Since

the manufacturer has supplied adequate data to establish the safety and efficacy of the subject drug and since it is in the public interest not to delay in providing for its certification, notice and public procedure and delayed effective date are not prerequisites to this promulgation.

Effective date. This order shall be effective upon publication in the FEDERAL REGISTER.

(Sec. 507, 59 Stat. 463, as amended; 21 U.S.C. 357)

Dated: December 18, 1968.

J. K. KIRK,
Associate Commissioner
for Compliance.

Title 25—INDIANS

Chapter I—Bureau of Indian Affairs, Department of the Interior

SUBCHAPTER O—RIGHTS-OF-WAY—ROADS

PART 161—RIGHTS-OF-WAY OVER INDIAN LANDS

DECEMBER 20, 1968.

On page 5512 of the FEDERAL REGISTER of April 4, 1967, there was published a notice of intent to completely revise Part 161, Title 25, Code of Federal Regulations, and the text of the proposed revised regulations. The purposes of the revision were to provide modern methods of conveying rights-of-way; to realign material to present a more logical sequence; to delete material regarded as advisory rather than regulatory in nature; and to add certain material which more fully encompasses the authorities of law.

Interested persons were given an opportunity to submit comments, suggestions, or objections with respect to the proposed revision within 30 days from the publication of the notice in the FEDERAL REGISTER. The period for submitting comments, suggestions, or objections was subsequently extended. During these periods many comments, suggestions, or objections were received from Indian Tribes and associations, tribal attorneys, Members of Congress, Indian Bureau officials, public utility companies, various State agencies, and other interested citizens. A large number of the comments received objected to the proposed revision in its entirety. The reason stated was a belief that the revision sacrificed the interests of Indian landowners for the convenience of right-of-way applicants and the Government. Virtually all of the comments received from Indians, Indian groups, and their attorneys strongly objected to the proposed provision which would permit a right-of-way grant on land of a tribe not organized under the Indian Reorganization Act or the Oklahoma Indian Welfare Act without tribal consent. Other provisions objected to can be broadly described as follows:

1. Secretarial discretion in requiring maps of definite location, in payment of not less than estimated fair market value, the execution of stipulations, and advance deposit of estimated survey and construction damages.

2. Elimination of provisions dealing with construction in advance of right-of-way grants, standards for maps of definite location, detailed requirements for different types of rights-of-way, notification when allotted land is condemned, and service lines.

3. Limitation on terms of rights-of-way for some purposes, such as pipelines and electric transmission lines.

4. The inclusion of provisions giving the Government certain rights with respect to electric transmission lines with capacity over 33 kv.

5. The failure to provide some form of arbitration when a tribe refuses to agree on compensation or otherwise refuses to consent.

6. The requirements for advance consent to a survey.

7. The absence of procedures for right-of-way termination.

8. The provisions for right-of-way renewal, and the lack of consent requirements for renewal.

9. Lack of provision validating prescriptive uses.

10. Failure to provide for nontermination of rights-of-way for pregrant irregularities and protection from interference with the right-of-way.

In addition, one organization submitted a proposal for the complete revision of existing and proposed right-of-way regulations.

After substantial consideration of all comments received, it has been determined that the proposed regulations should be materially changed and that many of the provisions of existing regulations should be retained. In addition to various editorial changes, the existing regulations will be effected in the following ways:

1. The Definitions section, § 161.1, is changed to eliminate the terms "Commissioner", "Area Director", "Superintendent", "Indians", "Tribal Counsel", "Restricted Lands", and "Damages". Instead, the terms "Individually owned land", "Tribal land", and "Government owned land" have been defined. A sentence has been added to the definition of "Secretary" instructing applicants to determine the identity of the authorized representative of the Secretary at local Indian Bureau installations. Compared to the proposed regulations, the definitions of "Tribe" and "Tribal land" have been separated. The words, "when the grant of right-of-way will not interfere with the use of the land for the purpose for which it is reserved," modifying the definition of tribal and reserved for Indian Bureau administrative purposes, have been deleted.

2. The Purpose and Scope section, § 161.2, is substantially in the form of the proposed § 161.2.

3. The Consent section, § 161.3, has not been revised or changed.

4. The permission to survey section, § 161.4, has been revised to clarify the

type of documents which must be furnished and to require indemnification. Language has been added to cover the situation where the applicant is a governmental agency which cannot deposit damages in advance or agree to indemnification.

5. The Permission to commence construction section, § 161.5, and the Disposition of deposit section, § 161.6, have been deleted, as they were in the proposed regulations. It is believed that giving permission to construct in advance of the grant of right-of-way does not serve the best interests of the landowners.

6. The Application for right-of-way section, § 161.7, has been renumbered and revised to add six new stipulations and to modify in certain particulars those already required. All of the stipulations are mandatory except where a governmental applicant can demonstrate that it cannot legally agree to certain of them. Also the documents which must be filed with the application are specified in some detail.

7. The sections dealing with maps and surveys, § 161.8-13, are retained with only minor changes including renumbering.

8. The Appraisal and schedule of damages section, § 161.14, has been changed along the lines set out in the proposed § 161.4. Consideration for grants of rights-of-way, and is now § 161.12. The differences are that instead of the Secretary having the authority to waive compensation, this right is given to the landowners with Secretarial approval. The word "estimated" has been changed to "appraised," and it is made clear that the same standards apply to a renewal.

9. The proposed Other damages section, § 161.15, has been slightly changed and retained as § 161.13.

10. The Deposit of damages section, § 161.15, has been renumbered and revised to indicate when consideration and damages must be deposited, what they consist of, and when they are to be disbursed. Language has been added to require the deposit for any tract to be not less than the amount shown on the consent for that tract.

11. The Action on application section, § 161.16, has been renumbered and revised to provide for the issuance of a right-of-way instrument. Grants may be made on separate tracts or on all at one time. Maps may be attached to conveyance instruments as exhibits when this is desirable. The procedure for recording grants is also specified.

12. The Affidavit of completion section, § 161.17, has been renumbered and supplemented by language making the right-of-way grant subject to cancellation for failure to file an affidavit.

13. The Change of location section, § 161.18, has been renumbered and revised to reflect the grant of right-of-way by issuance of an instrument. When a change of location is desired, a reconveyance of the original grant is required. The reference to construction in advance of the grant is deleted.

14. The Tenure of approved right-of-way grants section, § 161.19, has been renumbered; the references to renewal

and termination have been deleted; and additional use purposes, primarily public utilities, have been included in the use purposes for which grants may be made without limitation as to term of years with the consent of the landowner.

15. The Renewal of right-of-way grants section, § 161.20, has been renumbered and changed to more clearly set forth the consideration requirements.

16. A new § 161.20 has been added to prescribe a procedure for termination of right-of-way grants.

17. The Service lines section, § 161.21, has been renumbered and editorially revised inclusive of making a practical increase in the kilovolt capacities for powerlines in order to meet present day needs. Significant addition involves service lines on tribal land. If the contract under which an occupant or user of tribal land obtained his rights waives tribal consent for service lines, such consent will not be required.

18. The Condemnation suits involving individually owned restricted lands section, § 161.22, has been renumbered and editorially revised.

19. The sections dealing with specific types of right-of-way, § 161.23 *Railroads*, § 161.24 *Railroads in Oklahoma*, § 161.25 *Oil or gas pipelines*, § 161.26 *Telephone and telegraph lines*, radio, television, and other communications facilities, and § 161.27 *Power projects*, have all been revised in similar ways. The acts under which these rights-of-way may be granted are cited. Provisions required by those acts are included. When a right-of-way is granted for one of these purposes under the 1948 right-of-way act, the provisions of these sections will govern unless a decision is made to except some of the specific requirements. General changes have been made in the Power projects section, § 161.27. The size of a project for which applications must be submitted to the Assistant Secretary for Water and Power development has been increased from 33 kv. to 66 kv. Also the voltage of transmission lines in connection with which special stipulations must be filed has been changed from 33 kv. or more to 66 kv. or more. The language under which no value will be allowed for the right-of-way granted under these regulations in determining the compensation to be paid to the applicant if its transmission line or facilities are later acquired by the United States, has been deleted. The special mapping language in § 161.27(f) for lines under 33 kv. is also deleted.

20. The Public highways section, § 161.28, has been retained with minor changes.

21. The Drainage projects in Oklahoma section, § 161.29, which primarily involves assessments, has been deleted.

22. The Withdrawal and restoration of superintendent's authority section, § 161.20, and the Appeals section, § 161.31, are both deleted because they are no longer necessary.

The revised Part 161 shall become effective upon the date of its publication in the FEDERAL REGISTER.

ROBERT L. BENNETT,
Commissioner.

Part 161 is revised to read as follows:

- Sec.
- 161.1 Definitions.
- 161.2 Purpose and scope of regulations.
- 161.3 Consent of landowners to grants of rights-of-way.
- 161.4 Permission to survey.
- 161.5 Application for right-of-way.
- 161.6 Maps.
- 161.7 Field notes.
- 161.8 Public survey.
- 161.9 Connection with natural objects.
- 161.10 Township and section lines.
- 161.11 Affidavit and certificate.
- 161.12 Consideration for right-of-way grants.
- 161.13 Other damages.
- 161.14 Deposit and disbursement of consideration and damages.
- 161.15 Action on application.
- 161.16 Affidavit of completion.
- 161.17 Change of location.
- 161.18 Tenure of approved right-of-way grants.
- 161.19 Renewal of right-of-way grants.
- 161.20 Termination of right-of-way grants.
- 161.21 Condemnation actions involving individually owned lands.
- 161.22 Service lines.
- 161.23 Railroads.
- 161.24 Railroads in Oklahoma.
- 161.25 Oil or gas pipelines.
- 161.26 Telephone and telegraph lines; radio, television, and other communications facilities.
- 161.27 Power projects.
- 161.28 Public highways.

AUTHORITY: The provisions of this Part 161 issued under R.S. 161 (5 U.S.C. 22); 62 Stat. 17 (25 U.S.C. 323-328), and other acts cited in the text.

§ 161.1 Definitions.

As used in this Part 161:

(a) "Secretary" means the Secretary of the Interior or his authorized representative acting under delegated authority. Before proceeding under these regulations anyone desiring a right-of-way should inquire at the Indian Agency, Area Field Office, or other office of the Bureau of Indian Affairs having immediate supervision over the lands involved to determine the identity of the authorized representative of the Secretary for the purposes of this Part 161.

(b) "Individually owned land" means land or any interest therein held in trust by the United States for the benefit of individual Indians and land or any interest therein held by individual Indians subject to Federal restrictions against alienation or encumbrance.

(c) "Tribe" means a tribe, band, nation, community, group or pueblo of Indians.

(d) "Tribal land" means land or any interest therein, title to which is held by the United States in trust for a tribe, or title to which is held by any tribe subject to Federal restrictions against alienation or encumbrance, and includes such land reserved for Indian Bureau administrative purposes. The term also includes lands held by the United States in trust for an Indian corporation chartered under section 17 of the Act of June 18, 1934 (48 Stat. 988; 25 U.S.C. 477).

(e) "Government owned land" means land owned by the United States and under the jurisdiction of the Secretary which was acquired or set aside for the

use and benefit of Indians and not included in the definitions set out in paragraphs (b) and (d) of this section.

§ 161.2 Purpose and scope of regulations.

(a) Except as otherwise provided in § 1.2 of this chapter, the regulations in this Part 161 prescribe the procedures, terms and conditions under which rights-of-way over and across tribal land, individually owned land and Government owned land may be granted.

(b) Appeals from administrative action taken under the regulations in this Part 161 shall be made in accordance with Part 2 of this chapter.

(c) The regulations contained in this Part 161 do not cover the granting of rights-of-way upon tribal lands within a reservation for the purpose of constructing, operating, or maintaining dams, water conduits, reservoirs, powerhouses, transmission lines or other works which shall constitute a part of any project for which a license is required by the Federal Power Act. The Federal Power Act provides that any license which shall be issued to use tribal lands within a reservation shall be subject to and contain such conditions as the Secretary of the Interior shall deem necessary for the adequate protection and utilization of such lands. (16 U.S.C. 797(e)). In the case of tribal lands belonging to a tribe organized under the Act of June 18, 1934 (48 Stat. 984), the Federal Power Act requires that annual charges for the use of such tribal lands under any license issued by the Federal Power Commission shall be subject to the approval of the tribe (16 U.S.C. 803(e)).

§ 161.3 Consent of landowners to grants of rights-of-way.

(a) No right-of-way shall be granted over and across any restricted lands belonging to a tribe, nor shall any permission to survey or to commence construction be issued with respect to any such lands, without the prior written consent of the tribal council.

(b) Except as provided in paragraph (c) of this section, no right-of-way shall be granted over and across any individually owned restricted lands, nor shall any permission to survey or to commence construction be issued with respect to any such lands, without the prior written consent of the owner or owners of such lands and the approval of the Secretary.

(c) The Secretary may issue permission to survey or to commence construction with respect to, and he may grant rights-of-way over and across, restricted lands of individual Indians without the consent of the individual Indian owners when (1) the individual owner of the land or of an interest therein is a minor or a person non compos mentis, and the Secretary finds that such grant will cause no substantial injury to the land or the owner, which cannot be adequately compensated for by monetary damages; (2) the land is owned by more than one person, and the owners or owner of a majority of the interests therein consent to the grant; (3) the whereabouts

of the owner of the land or an interest therein are unknown, and the owners or owner of any interests therein whose whereabouts are known, or a majority thereof, consent to the grant; (4) the heirs or devisees of a deceased owner of the land or an interest therein have not been determined, and the Secretary finds that the grant will cause no substantial injury to the land or any owner thereof; (5) the owners of interests in the land are so numerous that the Secretary finds it would be impracticable to obtain their consent, and also finds that the grant will cause no substantial injury to the land or any owner thereof.

§ 161.4 Permission to survey.

Anyone desiring to obtain permission to survey for a right-of-way across individually owned, tribal or Government owned land must file a written application therefor with the Secretary. The application shall adequately describe the proposed project, including the purpose and general location, and it shall be accompanied by the written consents required by § 161.3, by satisfactory evidence of the good faith and financial responsibility of the applicant, and by a check or money order of sufficient amount to cover twice the estimated damages which may be sustained as a result of the survey. With the approval of the Secretary, a surety bond may be substituted in lieu of a check or money order accompanying an application, provided the company issuing the surety bond is licensed to do business in the State where the land to be surveyed is located. The application shall contain an agreement to indemnify the United States, the owners of the land, and occupants of the land, against liability for loss of life, personal injury and property damage occurring because of survey activities and caused by the applicant, his employees, contractors and their employees, or subcontractors and their employees. When the applicant is an agency or instrumentality of the Federal or a State Government and is prohibited by law from depositing estimated damages in advance or agreeing to indemnification, the requirement for such a deposit and indemnification may be waived providing the applicant agrees in writing to pay damages promptly when they are sustained. An application filed by a corporation must be accompanied by a copy of its charter or articles of incorporation duly certified by the proper State official of the State where the corporation was organized, and a certified copy of the resolution or bylaws of the corporation authorizing the filing of the application. When the land covered by the application is located in a State other than that in which the applicant was incorporated, it must also submit a certificate of the proper State official that the applicant is authorized to do business in the State where the land is located. An application filed by an unincorporated partnership or association must be accompanied by a certified copy of the articles of partnership or association, or if there be none, this fact must be stated over the

signature of each member of the partnership or association. If the applicant has previously filed with the Secretary an application accompanied by the evidence required in this section, a reference to the date and place of such filing, accompanied by proof of current financial responsibility and good faith, will be sufficient. Upon receipt of an application made in compliance with the regulations of this Part 161, the Secretary may grant the applicant written permission to survey.

§ 161.5 Application for right-of-way.

Written application, in duplicate, for a right-of-way shall be filed with the Secretary. The application shall cite the statute or statutes under which it is filed and the width and length of the desired right-of-way, and shall be accompanied by satisfactory evidence of the good faith and financial responsibility of the applicant. An application filed by a corporation must be accompanied by a copy of its charter or articles of incorporation duly certified by the proper State official of the State where the corporation was organized, and a certified copy of the resolution or bylaws of the corporation authorizing the filing of the application. When the land covered by the application is located in a State other than that in which the applicant was incorporated, it must also submit a certificate of the proper State official that the applicant is authorized to do business in the State where the land is located. An application filed by an unincorporated partnership or association must be accompanied by a certified copy of the articles of partnership or association, or if there be none, this fact must be stated over the signature of each member of the partnership or association. If the applicant has previously filed with the Secretary an application accompanied by the evidence required by this section, a reference to the date and place of such filing will be sufficient. Except as otherwise provided in this section, the application shall be accompanied by a duly executed stipulation, in duplicate, expressly agreeing to the following:

- (a) To construct and maintain the right-of-way in a workmanlike manner.
- (b) To pay promptly all damages and compensation, in addition to the deposit made pursuant to § 161.4, determined by the Secretary to be due the landowners and authorized users and occupants of the land on account of the survey, granting, construction and maintenance of the right-of-way.
- (c) To indemnify the landowners and authorized users and occupants against any liability for loss of life, personal injury and property damage arising from the construction, maintenance, occupancy or use of the lands by the applicant, his employees, contractors and their employees, or subcontractors and their employees.
- (d) To restore the lands as nearly as may be possible to their original condition upon the completion of construction to the extent compatible with the purpose for which the right-of-way was granted.

(e) To clear and keep clear the lands within the right-of-way to the extent compatible with the purpose of the right-of-way; and to dispose of all vegetative and other material cut, uprooted, or otherwise accumulated during the construction and maintenance of the project.

(f) To take soil and resource conservation and protection measures, including weed control, on the land covered by the right-of-way.

(g) To do everything reasonably within its power to prevent and suppress fires on or near the lands to be occupied under the right-of-way.

(h) To build and repair such roads, fences, and trails as may be destroyed or injured by construction work and to build and maintain necessary and suitable crossings for all roads and trails that intersect the works constructed, maintained, or operated under the right-of-way.

(i) That upon revocation or termination of the right-of-way, the applicant shall, so far as is reasonably possible, restore the land to its original condition.

(j) To at all times keep the Secretary informed of its address, and in case of corporations, of the address of its principal place of business and of the names and addresses of its principal officers.

(k) That the applicant will not interfere with the use of the lands by or under the authority of the landowners for any purpose not inconsistent with the primary purpose for which the right-of-way is granted.

When the applicant is the U.S. Government or a State Government or an instrumentality thereof and is prohibited by law from executing any of the above stipulations, the Secretary may waive the requirement that the applicant agree to any stipulations so prohibited.

§ 161.6 Maps.

(a) Each application for a right-of-way shall be accompanied by maps of definite location consisting of an original on tracing linen or other permanent and reproducible material and two reproductions thereof. The field notes shall accompany the application, as provided in § 161.7. The width of the right-of-way shall be clearly shown on the maps.

(b) A separate map shall be filed for each section of 20 miles of right-of-way, but the map of the last section may include any excess of 10 miles or less.

(c) The scale of maps showing the line of route normally should be 2,000 feet to an inch. The maps may, however, be drawn to a larger scale when necessary and when an increase in scale cannot be avoided through the use of separate field notes, but the scale must not be increased to such extent as to make the maps too cumbersome for convenient handling and filing.

(d) The maps shall show the allotment number of each tract of allotted land, and shall clearly designate each tract of tribal land affected, together with the sections, townships, and ranges in which the lands crossed by the right-of-way are situated.

§ 161.7 Field notes.

Field notes of the survey shall appear along the line indicating the right-of-way on the maps, unless the maps would be too crowded thereby to be easily legible, in which event the field notes may be filed separately on tracing linen in such form that they may be folded readily for filing. Where field notes are placed on separate tracing linen, it will be necessary to place on the maps only a sufficient number of station numbers so as to make it convenient to follow the field notes. The field notes shall be typewritten. Whether endorsed on the maps or filed separately, the field notes shall be sufficiently complete so as to permit the line indicating the right-of-way to be readily retraced on the ground from the notes. They shall show whether the line was run on true or magnetic bearings, and, in the latter case, the variation of the needle and date of determination must be stated. One or more bearings (or angular connections with public survey lines) must be given. The 10-mile sections must be indicated and numbered on all lines of road submitted.

§ 161.8 Public survey.

(a) The termini of the line of route shall be fixed by reference of course and distance to the nearest existing corner of the public survey. The maps, as well as the engineer's affidavit and the certificate, shall show these connections.

(b) When either terminal of the line of route is upon unsurveyed land, it must be connected by traverse with an established corner of the public survey if not more than 6 miles distant from it, and the single bearing and distance from the terminal point to the corner computed and noted on the maps, in the engineer's affidavit, and in the certificate. The notes and all data for the computation of the traverse must be given.

§ 161.9 Connection with natural objects.

When the distance to an established corner of the public survey is more than 6 miles, this connection will be made with a natural object or a permanent monument which can be readily found and recognized, and which will fix and perpetuate the position of the terminal point. The maps must show the position of such mark, and course and distance to the terminus. There must be given an accurate description of the mark and full data concerning the traverse, and the engineer's affidavit and the certificate on the maps must state the connections.

§ 161.10 Township and section lines.

Whenever the line of survey crosses a township or section line of the public survey, the distance to the nearest existing corner shall be noted. The maps shall show these distances and the station numbers at the points of intersections. The field notes shall show these distances and the station numbers.

§ 161.11 Affidavit and certificate.

(a) There shall be subscribed on the maps of definite location an affidavit executed by the engineer who made the

survey and a certificate executed by the applicant, both certifying to the accuracy of the survey and maps and both designating by termini and length in miles and decimals, the line of route for which the right-of-way application is made.

(b) Maps covering roads built by the Bureau of Indian Affairs which are to be transferred to a county or State government shall contain an affidavit as to the accuracy of the survey, executed by the Bureau highway engineer in charge of road construction, and a certificate by the State or county engineer or other authorized State or county officer accepting the right-of-way and stating that he is satisfied as to the accuracy of the survey and maps.

§ 161.12 Consideration for right-of-way grants.

Except when waived in writing by the landowners or their representatives as defined in § 161.3 and approved by the Secretary, the consideration for any right-of-way granted or renewed under this Part 161 shall be not less than the appraised fair market value of the rights granted, plus severance damages, if any, to the remaining estate.

§ 161.13 Other damages.

In addition to the consideration for a grant of right-of-way provided for by the provisions of § 161.12, the applicant for a right-of-way will be required to pay all damages incident to the survey of the right-of-way or incident to the construction or maintenance of the facility for which the right-of-way is granted.

§ 161.14 Deposit and disbursement of consideration and damages.

At the time of filing an application for right-of-way, the applicant must deposit with the Secretary the total estimated consideration and damages, which shall include consideration for the right-of-way, severance damages, damages caused during the survey, and estimated damages to result from construction less any deposit previously made under § 161.4. In no case shall the amount deposited as consideration for the right-of-way over any parcel be less than the amount specified in the consent covering that parcel. If in reviewing the application, the Secretary determines that the amounts deposited are inadequate to compensate the owners, the applicant shall increase the deposit to an amount determined by the Secretary to be adequate. The amounts so deposited shall be held in a "special deposit" account for distribution to or for the account of the landowners and authorized users and occupants of the land. Amounts deposited to cover damages resulting from survey and construction may be disbursed after the damages have been sustained. Amounts deposited to cover consideration for the right-of-way and severance damages shall be disbursed upon the granting of the right-of-way. Any part of the deposit which is not required for disbursement as aforesaid shall be refunded to the applicant promptly following receipt of the affidavit of comple-

tion of construction filed pursuant to § 161.16.

§ 161.15 Action on application.

Upon satisfactory compliance with the regulations in this Part 161, the Secretary is authorized to grant the right-of-way by issuance of a conveyance instrument in the form approved by the Secretary. Such instrument shall incorporate all conditions or restrictions set out in the consents obtained pursuant to § 161.3. A copy of such instrument shall be promptly delivered to the applicant and thereafter the applicant may proceed with the construction work. Maps of definite location may be attached to and incorporated into the conveyance document by reference. In the discretion of the Secretary, one conveyance document may be issued covering all of the tracts of land traversed by the right-of-way, or separate conveyances may be made covering one or several tracts included in the application. A duplicate original copy of the conveyance instrument, permanent and reproducible maps, a copy of the application and stipulations, together with any other pertinent documents shall be transmitted by the Secretary to the office of record for land documents affecting the land covered by the right-of-way, where they will be recorded and filed.

§ 161.16 Affidavit of completion.

Upon the completion of the construction of any right-of-way, the applicant shall promptly file with the Secretary an affidavit of completion, in duplicate, executed by the engineer and certified by the applicant. The Secretary shall transmit one copy of the affidavit to the office of record mentioned in § 161.15. Failure to file an affidavit in accordance with this section shall subject the right-of-way to cancellation in accordance with § 161.20.

§ 161.17 Change of location.

If any change from the location described in the conveyance instrument is found to be necessary on account of engineering difficulties or otherwise, amended maps and field notes of the new location shall be filed, and a right-of-way for such new route or location shall be subject to consent, approval, the ascertainment of damages, and the payment thereof, in all respects as in the case of the original location. Before a revised conveyance instrument is issued, the applicant shall execute such instruments deemed necessary by the Secretary extinguishing the right-of-way at the original location. Such instruments shall be transmitted by the Secretary to the office of record mentioned in § 161.15 for recording and filing.

§ 161.18 Tenure of approved right-of-way grants.

All rights-of-way granted under the regulations in this Part 161 shall be in the nature of easements for the periods stated in the conveyance instrument. Except as otherwise determined by the Secretary and stated in the conveyance

instrument, rights-of-way granted under the Act of February 5, 1948 (62 Stat. 17; 25 U.S.C. 323-328) for railroads, telephone lines, telegraph lines, public roads, and highways, public sanitary and storm sewer lines including sewage disposal and treatment plants, water control and use projects (including but not limited to dams, reservoirs, flowage easements, ditches, and canals), oil, gas and public utility water pipelines (including pumping stations and appurtenant facilities), electric power projects, generating plants, switchyards, electric transmission and distribution lines (including poles, towers and appurtenant facilities), and for service roads and trails essential to any of the aforesaid use purposes, may be without limitation as to term of years; whereas, rights-of-way for all other purposes shall be for a period of not to exceed 50 years, as determined by the Secretary and stated in the conveyance instrument.

§ 161.19 Renewal of right-of-way grants.

On or before the expiration date of any right-of-way heretofore or hereafter granted for a limited term of years, an application may be submitted for a renewal of the grant. If the renewal involves no change in the location or status of the original right-of-way grant, the applicant may file with his application a certificate under oath setting out this fact, and the Secretary, with the consent required by § 161.3, may thereupon extend the grant for a like term of years, upon the payment of consideration as set forth in § 161.12. If any change in the size, type, or location of the right-of-way is involved, the application for renewal shall be treated and handled as in the case of an original application for a right-of-way.

§ 161.20 Termination of right-of-way grants.

All rights-of-way granted under the regulations in this part shall be terminable in whole or in part upon 30 days written notice from the Secretary mailed to the grantee at its latest address furnished in accordance with § 161.5(j), for any of the following causes:

- (a) Failure to comply with any term or condition of the grant or the applicable regulations;
- (b) A nonuse of the right-of-way for a consecutive 2-year period for the purpose for which it was granted;
- (c) An abandonment of the right-of-way.

If within the 30-day notice period the grantee fails to correct the basis for termination, the Secretary shall issue an appropriate instrument terminating the right-of-way. Such instrument shall be transmitted by the Secretary to the office of record mentioned in § 161.15 for recording and filing.

§ 161.21 Condemnation actions involving individually owned lands.

The facts relating to any condemnation action to obtain a right-of-way over individually owned lands shall be reported immediately by officials of the

Bureau of Indian Affairs having knowledge of such facts to appropriate officials of the Interior Department so that action may be taken to safeguard the interests of the Indians.

§ 161.22 Service lines.

(a) An agreement shall be executed by and between the landowner or a legally authorized occupant or user of individually owned land and the applicant before any work by the applicant may be undertaken to construct a service line across such land. Such a service line shall be limited in the case of power lines to a voltage of 14.5 kv. or less except lines to serve irrigation pumps and commercial and industrial uses which shall be limited to a voltage not to exceed 34.5 kv. A service line shall be for the sole purpose of supplying the individual owner or authorized occupant or user of land, including schools and churches, with telephone, water, electric power, gas, and other utilities for use by such owner, occupant, or user of the land on the premises.

(b) A similar agreement to that required in paragraph (a) of this section shall be executed by the tribe or legally authorized occupant or user of tribal land and the applicant before any work by the applicant may be undertaken for the construction of a service line across tribal land. A service line shall be for the sole purpose of supplying an occupant or user of tribal land with any of the utilities specified in paragraph (a) of this section. No agreement under this paragraph shall be valid unless its execution shall have been duly authorized in advance of construction by the governing body of the Indian tribe whose land is affected, unless the contract under which the occupant or user of the land obtained his rights specifically authorizes such occupant or user to enter into service agreements for utilities without further tribal consent.

(c) In order to encourage the use of telephone, water, electric power, gas and other utilities and to facilitate the extension of these modern conveniences to sparsely settled Indian areas without undue costs the agreement referred to in paragraph (a) of this section shall only be required to include or have appended thereto, a plat or diagram showing with particularity the location, size, and extent of the line. When the plat or diagram is placed on a separate sheet it shall bear the signature of the parties. In case of tribal land, the agreement shall be accompanied by a certified copy of the tribal authorization when required.

(d) An executed copy of the agreement, together with a plat or diagram, and in the case of tribal land, an authenticated copy of the tribal authorization, when required, shall be filed with the Secretary within 30 days after the date of its execution. Failure to meet this requirement may result in the removal of improvements placed on the land at the expense of the party responsible for the placing of such improvements and sub-

ject such party to the payment of damages caused by his unauthorized act.

§ 161.23 Railroads.

(a) The Act of March 2, 1899 (30 Stat. 990), as amended by the Acts of February 28, 1902 (32 Stat. 50), June 21, 1906 (34 Stat. 330), and June 25, 1910 (36 Stat. 859; 25 U.S.C. 312-318); the Act of March 3, 1875 (18 Stat. 482; 43 U.S.C. 934); and the Act of March 3, 1909 (35 Stat. 781), as amended by the Act of May 6, 1910 (36 Stat. 349; 25 U.S.C. 320), authorize grants of rights-of-way across tribal, individually owned and Government-owned land, except in the State of Oklahoma, for railroads, station buildings, depots, machine shops, side tracks, turnouts, and water stations; for reservoirs, material or ballast pits needed in the construction, repair, and maintenance of railroads; and for the planting and growing of trees to protect railroad lines. Rights-of-way granted under the above acts shall be subject to the provisions of this section as well as other pertinent sections of this Part 161. Except when otherwise determined by the Secretary, rights-of-way for the above purposes granted under the Act of February 5, 1948 (62 Stat. 17; 25 U.S.C. 323-328), shall also be subject to the provisions of this section.

(b) Rights-of-way for railroads shall not exceed 50 feet in width on each side of the centerline of the road, except where there are heavy cuts and fills, when they shall not exceed 100 feet in width on each side of the road. The right-of-way may include grounds adjacent to the line for station buildings, depots, machine shops, side tracks, turnouts, and water stations, not to exceed 200 feet in width by a length of 3,000 feet, with no more than one station to be located within any one continuous length of 10 miles of road.

(c) Short spurs and branch lines may be shown on the map of the main line, separately described by termini and length. Longer spurs and branch lines shall be shown on separate maps. Grounds desired for station purposes may be indicated on the map of definite location but separate plats must be filed for such grounds. The maps shall show any other line crossed, or with which connection is made. The station number shall be shown on the survey thereof at the point of intersection. All intersecting roads must be represented in ink of a different color from that used for the line for which application is made.

(d) Plats of railroad station grounds shall be drawn on a scale of 400 feet to an inch, and must be filed separately from the line of route. Such plats shall show enough of the line of route to indicate the position of the tract with reference thereto. Each station ground tract must be located with respect to the public survey as provided in § 161.8 and all buildings or other structures shall be platted on a scale sufficiently large to show clearly their dimensions and relative positions.

(e) If any proposed railroad is parallel to, and within 10 miles of, a railroad al-

ready built or in course of construction, it must be shown wherein the public interest will be promoted by the proposed road. Where the Interstate Commerce Commission has passed on this point, a certified copy of its findings must be filed with the application.

(f) The applicant must certify that the road is to be operated as a common carrier of passengers and freight.

(g) The applicant shall execute and file, in duplicate, a stipulation obligating the company to use all precautions possible to prevent forest fires and to suppress such fires when they occur, to construct and maintain passenger and freight stations for each Government townsite, and to permit the crossing, in a manner satisfactory to the Government officials in charge, of the right-of-way by canals, ditches, and other projects.

(h) A railroad company may apply for sufficient land for ballast or material pits, reservoirs, or tree planting to aid in the construction or maintenance of the road. The authority to use any land for such purposes shall terminate upon abandonment or upon failure to use the land for such purposes for a continuous period of 2 years.

§ 161.24 Railroads in Oklahoma.

(a) The Act of February 28, 1902 (32 Stat. 43), authorizes right-of-way grants across tribal and individually owned land in Oklahoma. Rights-of-way granted under that act shall be subject to the provisions of this section as well as other pertinent sections of this Part 161. Except when otherwise determined by the Secretary, railroad rights-of-way in Oklahoma granted under the Act of February 5, 1948 (62 Stat. 17; 25 U.S.C. 323-328), shall also be subject to the provisions of this section.

(b) One copy on tracing linen of the map of definite location showing the line of route and all lands included within the right-of-way must be filed with the Secretary. When tribal lands are involved, a copy of the map must also be filed with the tribal council.

(c) Before any railroad may be constructed or any lands taken or condemned for any of the purposes set forth in section 13 of the Act of February 28, 1902 (32 Stat. 47), full damages shall be paid to the Indian owners.

(d) After the maps have been filed, the matter of damages shall be negotiated by the applicant directly with the Indian owners. If an amicable settlement cannot be reached, the amount to be paid as compensation and damages shall be fixed and determined as provided in the statute. If court proceedings are instituted, the facts shall be reported immediately as provided in § 161.21.

§ 161.25 Oil and gas pipelines.

(a) The Act of March 11, 1904 (33 Stat. 65), as amended by the Act of March 2, 1917 (39 Stat. 973; 25 U.S.C. 321), authorizes right-of-way grants for oil and gas pipelines across tribal, individually owned and Government-owned land. Rights-of-way granted under that

act shall be subject to the provisions of this section as well as other pertinent sections of this Part 161. Except when otherwise determined by the Secretary, rights-of-way granted for such purposes under the Act of February 5, 1948 (62 Stat. 17; 25 U.S.C. 323-328) shall also be subject to the provisions of this section.

(b) Rights-of-way, granted under aforesaid Act of March 11, 1904, as amended, for oil and gas pipelines, pumping stations or tank sites shall not extend beyond a term of 20 years and may be extended for another period of not to exceed 20 years following the procedures set out in § 161.19 of this part.

(c) All oil or gas pipelines, including connecting lines, shall be buried a sufficient depth below the surface of the land so as not to interfere with cultivation. Whenever the line is laid under a road or highway, the right-of-way for which has been granted under an approved application pursuant to an act of Congress, its construction shall be in compliance with the applicable Federal and State laws; during the period of construction, at least one-half the width of the road shall be kept open to travel; and, upon completion, the road or highway shall be restored to its original condition and all excavations shall be refilled. Whenever the line crosses a ravine, canyon, or waterway, it shall be laid below the bed thereof or upon such superstructure as will not interfere with the use of the surface.

(d) The size of the proposed pipeline must be shown in the application, on the maps, and in the engineer's affidavit and applicant's certificate. The application and maps shall specify whether the pipe is welded, screw-joint, dresser, or other type of coupling. Should the grantee of an approved right-of-way desire at any time to lay additional line or lines of pipe in the same trench, or to replace the original line with larger or smaller pipe, written permission must first be obtained from the Secretary and all damages to be sustained by the owners must be paid in advance in the amount fixed and determined by the Secretary.

(e) Applicants for oil or gas pipeline rights-of-way may apply for additional land for pumping stations or tank sites. The maps shall show clearly the location of all structures and the location of all lines connecting with the main line. Applicants for lands for pumping stations or tank sites shall execute and file a stipulation agreeing as follows:

(1) Upon abandonment of the right-of-way to level all dikes, fire-guards, and excavations and to remove all concrete masonry foundations, bases, and structural works and to restore the land as nearly as may be possible to its original condition.

(2) That a grant for pumping station or tank site purposes shall be subservient to the owner's right to remove or authorize the removal of oil, gas, or other mineral deposits; and that the structures for pumping station or tank site will be removed or relocated if necessary to avoid interference with the exploration for or recovery of oil, gas, or other minerals.

(f) Purely lateral lines connecting with oil or gas wells on restricted lands may be constructed upon filing with the Secretary a copy of the written consent of the Indian owners and a blueprint copy of a map showing the location of the lateral. Such lateral lines may be of any diameter or length, but must be limited to those used solely for the transportation of oil or gas from a single tract of tribal or individually owned land to another lateral or to a branch of the main line.

(g) The applicant, by accepting a pipeline right-of-way, thereby agrees that the books and records of the applicant shall be open to inspection by the Secretary at all reasonable times, in order to obtain information pertaining in any way to oil or gas produced from tribal or individually owned lands or other lands under the jurisdiction of the Secretary.

§ 161.26 Telephone and telegraph lines; radio, television, and other communications facilities.

(a) The Act of February 15, 1901 (31 Stat. 790), as amended by the Act of March 4, 1940 (54 Stat. 41; 43 U.S.C. 959); the Act of March 4, 1911 (36 Stat. 1253), as amended by the Act of May 27, 1952 (66 Stat. 95; 43 U.S.C. 961); and the Act of March 3, 1901 (31 Stat. 1083; 25 U.S.C. 319), authorize right-of-way grants across tribal, individually owned, and Government-owned land for telephone and telegraph lines and offices, for poles and lines for communication purposes, and for radio, television, and other forms of communication transmitting, relay, and receiving structures and facilities. Rights-of-way granted under these acts shall be subject to the provisions of this section as well as other pertinent sections of this Part 161. Except when otherwise determined by the Secretary, rights-of-way granted for such purposes under the Act of February 5, 1948 (62 Stat. 17; 25 U.S.C. 323-328), shall also be subject to the provisions of this section.

(b) A right-of-way granted under the said Act of March 4, 1911, as amended, shall be limited to a term not exceeding 50 years from the date of the issuance of such grant.

(c) No right-of-way shall be granted for a width in excess of 50 feet on each side of the centerline, unless special requirements are clearly set forth in the application which fully justify a width in excess of 50 feet on each side of the centerline.

(d) Applicants engaged in the general telephone and telegraph business may apply for additional land for office sites. The maps showing the location of proposed office sites shall be filed separately from those showing the line of route, and shall be drawn to a scale of 50 feet to an inch. Such maps shall show enough of the line of route to indicate the position of the tract with reference thereto. The tract shall be located with respect to the public survey as provided in § 161.8, and all buildings or other structures shall be platted on a scale sufficiently large to show clearly their dimensions and relative positions.

(e) Rights-of-way for poles and lines for communication purposes, and for radio, television, and other forms of communication transmitting, relay, and receiving structures and facilities, shall be limited to 200 feet on each side of the centerline of such lines and poles; radio and television, and other forms of communication transmitting, relay, and receiving structures and facilities shall be limited to an area not to exceed 400 feet by 400 feet.

§ 161.27 Power projects.

(a) The Act of March 4, 1911 (36 Stat. 1253), as amended by the Act of May 27, 1952 (66 Stat. 95; 43 U.S.C. 961), authorizes right-of-way grants across tribal, individually owned and Government-owned land for electrical poles and lines for the transmission and distribution of electrical power. Rights-of-way granted under that act shall be subject to the provisions of this section as well as other pertinent sections of this Part 161. Except when otherwise determined by the Secretary, rights-of-way granted for such purposes under the Act of February 5, 1948 (62 Stat. 17; 25 U.S.C. 323-328) shall also be subject to the provisions of this section.

(b) All applications for authority to survey, locate, or commence construction work on any project for the generation of electric power, or the transmission or distribution of electrical power of 66 kv. or higher involving lands other than tribal lands dealt with in the exception contained in § 161.2(c) shall be referred to the Office of the Assistant Secretary of the Interior for Water and Power Development or such other agency as may be designated for the area involved, for consideration of the relationship of the proposed project to the power development program of the United States. Where the proposed project will not conflict with the program of the United States, the Secretary, upon notification to that effect may then proceed to act upon the application. In the case of necessary changes respecting the proposed location, construction, or utilization of the project in order to eliminate conflicts with the power development program of the United States, the Secretary shall obtain from the applicant written consent to or compliance with such requirements before taking further action on the application.

(c) A right-of-way granted under the said Act of March 4, 1911, as amended, shall be limited to a term not exceeding 50 years from the date of the issuance of such grant.

(d) Rights-of-way for power lines shall be limited to those widths which can be justified and in no event shall exceed a width of 200 feet on each side of the centerline.

(e) The applicant shall make provision, or bear the reasonable cost (as may be determined by the Secretary) of making provision, for avoiding inductive interference between any project transmission line or other project works constructed, operated, or maintained by it on the right-of-way authorized under the grant and any radio installation,

telephone line, or other communication facilities now or hereafter constructed and operated by the United States or any agency thereof. This provision shall not relieve the applicant from any responsibility or requirement which may be imposed by other lawful authority for avoiding or eliminating inductive interference.

(f) An applicant for a right-of-way for a transmission line having a voltage of 66 kv. or more must, in addition to the stipulation required by § 161.5, execute and file with its application a stipulation agreeing to accept the right-of-way grant subject to the following conditions:

(1) The applicant agrees that, in the event it becomes necessary for the United States to acquire the applicant's transmission line or facilities constructed on or across such right-of-way, the United States reserves the right to acquire such line or facilities at a sum to be determined upon by a representative of the applicant, a representative of the Secretary of the Interior, and a third representative to be selected by the other two for the purpose of determining the value of such property thus to be acquired by the United States.

(2) To allow the Department of the Interior to utilize for the transmission of electrical power any surplus capacity of the line in excess of the capacity needed by the holder of the grant for the transmission of electrical power in connection with the applicant's operations, or to increase the capacity of the line at the Department's expense and to utilize the increased capacity for the transmission of electrical power. Utilization by the Department of surplus or increased capacity shall be subject to the following terms and conditions:

(i) When the Department desires to utilize surplus capacity thought to exist in a line, notification will be given to the applicant and the applicant shall furnish to the Department within 30 days a certificate stating whether the line has any surplus capacity not needed by the applicant for the transmission of electrical power in connection with the applicant's operations, and, if so, the extent of such surplus capacity.

(ii) In order to utilize any surplus capacity certified by the applicant to be available, or any increased capacity provided by the Department at its own expense, the Department may interconnect its transmission facilities with the applicant's line in a manner conformable to approved standards of practice for the interconnection of transmission circuits.

(iii) The expense of interconnection will be borne by the Department, and the Department will at all times provide and maintain adequate switching, relaying, and protective equipment so as to insure that the normal and efficient operation of the applicant's line will not be impaired.

(iv) After any interconnection is completed, the applicant shall operate and maintain its line in good condition; and, except in emergencies, shall maintain in a closed position all connections under

the applicant's control between the applicant's line and the interconnecting facilities provided by the Department.

(v) The interconnected power systems of the Department and the applicant will be operated in parallel.

(vi) The transmission of electrical power by the Department over the applicant's line will be effected in such manner and quantity as will not interfere unreasonably with the applicant's use and operation of the line in accordance with the applicant's normal operating standards, except that the Department shall have the exclusive right to utilize any increased capacity of the line which has been provided at the Department's expense.

(vii) The applicant will not be obligated to allow the transmission over its line by the Department of electrical power to any person receiving service from the applicant on the date of the filing of the application for a grant, other than persons entitled to statutory preference in connection with the distribution and sale of electrical power by the Department.

(viii) The Department will pay to the applicant an equitable share of the total monthly cost of maintaining and operating the part of the applicant's line utilized by the Department for the transmission of electrical power, the payment to be an amount in dollars representing the same proportion of the total monthly operation and maintenance cost of such part of the line as the maximum amount in kilowatts of the power transmitted on a scheduled basis by the Department over the applicant's line during the month bears to the total capacity in kilowatts of that part of the line. The total monthly cost may include interest and amortization, in accordance with the system of accounts prescribed by the Federal Power Commission, on the applicant's net total investment (exclusive of any investment by the Department) in the part of the line utilized by the Department.

(ix) If, at any time subsequent to a certification by the applicant that surplus capacity is available for utilization by the Department, the applicant needs for the transmission of electrical power in connection with its operations the whole or any part of the capacity of the line theretofore certified as being surplus to its needs, the applicant may modify or revoke the previous certification by giving the Secretary of the Interior 30 months' notice, in advance, of the applicant's intention in this respect. After the revocation of a certificate, the Department's utilization of the particular line will be limited to the increased capacity, if any, provided by the Department at its expense.

(x) If, during the existence of the grant, the applicant desires reciprocal accommodations for the transmission of electrical power over the interconnecting system of the Department to its line, such reciprocal accommodations will be accorded under terms and conditions similar to those prescribed in this paragraph with respect to the transmission

by the Department of electrical power over the applicant's line.

(xi) The terms and conditions prescribed in this paragraph may be modified at any time by means of a supplemental agreement negotiated between the applicant and the Secretary of the Interior or his designee.

(g) Applicants may apply for additional lands for generating plants and appurtenant facilities. The lands desired for such purposes may be indicated on the maps showing the definite location of the right-of-way, but separate maps must be filed therefor. Such maps shall show enough of the line of route to indicate the position of the tract with respect to said line. The tract shall be located with respect to the public survey as provided in § 161.8, and all buildings or other structures shall be platted on a scale sufficiently large to show clearly their dimensions and relative positions.

§ 161.28 Public highways.

(a) The appropriate State or local authorities may apply under the regulations in this Part 161 for authority to open public highways across tribal and individually owned lands in accordance with State laws, as authorized by the Act of March 3, 1901 (31 Stat. 1084; 25 U.S.C. 311).

(b) In lieu of making application under the regulations in this Part 161, the appropriate State or local authorities in Nebraska or Montana may, upon compliance with the requirements of the Act of March 4, 1915 (38 Stat. 1188), lay out and open public highways in accordance with the respective laws of those States. Under the provisions of that act, the applicant must serve the Secretary with notice of intention to open the proposed road and must submit a map of definite location on tracing linen showing the width of the proposed road for the approval of the Secretary prior to the laying out and opening of the road.

(c) Applications for public highway rights-of-way over and across roadless and wild areas shall be considered in accordance with the regulations contained in Part 163 of this chapter.

[F.R. Doc. 68-15376; Filed, Dec. 26, 1968; 8:46 a.m.]

Title 26—INTERNAL REVENUE

Chapter I—Internal Revenue Service, Department of the Treasury

SUBCHAPTER A—INCOME TAX

[T.D. 6985]

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DE- CEMBER 31, 1953

Medical Expense Deduction

On September 12, 1968, notice of proposed rule making with respect to the amendments of the Income Tax Regulations (26 CFR Part 1) under sections 72, 79, 213, 401, and 405 of the Internal Revenue Code of 1954 to conform the regulations to changes made by section
